ABSTRACT

The invention is to provide a novel
polyhydroxyalkanoate having a reactive functional

5 group within a molecule, a novel polyhydroxyalkanoate
having a novel function by a chemical modification of
the polyhydroxyalkanoate having the reactive
functional group, and a producing method therefor. A
polyhydroxyalkanoate containing a unit having a

10 carboxyl group in a side chain is utilized for
deriving a polyhydroxyalkanoate containing a unit
having an amide group and a sulfonic acid group in
the molecule.
